Testable Question:

Hypothesis:

Operational Definition

Why (a few bullet points or sentences indicating why you are interested in this topic)

How/Research methods (plan for how you will collect your data). If you need help with this portion of the project, let me know. See scientific method handout.

Please check all that apply below:

survey experiment case study naturalistic observation

Then discuss how you think you will set up your project (e.g. if survey, define your demographic and discuss how you will collect your survey results. If experiment, define your dependent and independent variables, discuss if it will be a blind or single blind study). You may also write me a note that you need help.
